Before filing out the application for an investigation for public probate conservatorship, please read the following information:

LEGAL CRITERIA: Inability to properly provide for food, clothing, shelter, or physical health (conservatorship of the person) and/or substantial inability to manage financial resources, or resist fraud, or undue influence (conservatorship of the estate). The individual's incapacity must be measured and confirmed by the attending physician.

GUIDING MANDATES: A conservatorship is not an emergency response instrument. It may require as much as 8-12 weeks from the beginning of an investigation, to an actual court date. Additionally, legislation contemplates that a public probate conservatorship be the last resort and that all alternatives to such conservatorship be explored first. A public probate conservatorship may not be appropriate as a preventative measure. Generally an individual must meet the legal criteria at the time the referral is made.

I. FACTORS WHICH GENERALLY FAVOR A PUBLIC PROBATE CONSERVATORSHIP

A. The inability to think logically or exercise sound judgment. This is important when considering if the individual can provide for his/her own care and well being.

   1. Examples:
      a. If multiple physical treatments are necessary and the individual lacks the ability to perceive: basic concepts of self care, diagnosis, options or treatment available; and is unable to give informed consent.
      b. Severe memory loss resulting in the individual's being unable to discern whether his/her needs are being met such as payment for housing, meals, clothing, medications, etc.
      c. Inability to choose an appropriate responsible individual to act on his/her behalf.

B. A primary physical diagnosis which might also affect mental functioning such as stroke, Alzheimer's disease, etc. OR a primary physical disabling disease with a secondary mental impairment which does not require mental health treatment.

C. No family members are able to provide care or act a conservator.

II. FACTORS WHICH GENERALLY DISCOURAGE A PUBLIC PROBATE CONSERVATORSHIP:

A. The individual has the ability to provide for and choose his/her own services (e.g. a person is in a nursing home, is alert and able to execute a power of attorney).

B. A second party (e.g. friend family member, facility) is providing for all of the individual's needs.

C. The individual has a primary diagnosis of mental illness or alcoholism which requires placement in a locked treatment facility.

D. The individual presents a continual resistance to assistance (e.g. able to physically resist initial placement, willing and able to walk out of treatment or placement, able to articulate and justify reasons he/she objects to a conservatorship).

E. Conservatorship is desired simply to facilitate medical consent or to pay bills.

F. The individual is 'on the streets.' The Public Guardian cannot adequately conduct an investigation unless the individual is in some type of placement such as a hospital, home, facility, etc.
