7. DEPUTY DIRECTOR'S QUARTERLY REPORT: Deputy Director, David J. Quiroz

Deputy Director, David J. Quiroz reported on the Second Quarter Service Report.

- Supportive Services have picked up second quarter. Outreach and Transportation are ahead of annual targets which means that they're still touching base with people that need those services.
- Adult day care has been suspended during first and second quarters and still waiting to see what happens with the third quarter and will report that information out once it received.
- For senior nutrition there's been a shift in numbers between congregate and home delivered meals but it's nothing to be alarmed about, it's just the way that the CDA is collecting information for Grab and Go meals but everything is still on track.
- There was nothing to report for disease prevention and health promotion for first and second quarter but hoping to have some numbers to report by the third quarter.
- Family Caregiver everything there is steady and still moving forward with family caregiver support program.
- Long-term Care Ombudsman Program is now a contracted service for San Bernardino County with Wise & Healthy Aging, so there's nothing there to report for second quarter. This has to do with some data changes with transitioning staff and transitioning services into Wise & Healthy Aging.
- For health insurance, counseling and advocacy there have been having fewer sessions but larger groups. They're well behind in terms of annual contracts but starting to wrap things back up and they're hopeful to continue to make progress in that area.
- With MSSP they have slots that they're attempting to fill. They're currently at 90 98%. Hopeful by third quarter they're closer to 100%.
- In terms of In Home Supportive Services (IHSS), they're average monthly active cases is 36,173. For Adult Protective Services (APS) was about 1,059 cases, not quite 1,100, but that's an increase as well.

Aging and Adult Services - Public Guardian Senior Affairs Commission

- **Commissioner Ferguson reported on the following Bill highlights:**
 - **AB1855: Long-Term Care Ombudsman Program: facility access:** Current law provides for the Long-Term Care Ombudsman Program under which funds are allocated to local ombudsman programs to assist elderly persons in long-term health care facilities and residential care facilities by, among other things, investigating and seeking to resolve complaints against these facilities, and providing services to assist residents in the protection of their health, safety, welfare, and rights. Under current law, if an individual is a patient in a skilled nursing facility when a written advance health care directive is executed, the advance health care directive is not effective unless a patient advocate or ombudsman signs the advance directive as a witness, as specified. This bill, notwithstanding any other law, would prohibit a skilled nursing facility or residential care facility from denying entry to a representative of the office acting in their official capacity, under any circumstances.
 - **AB 1907: Long-term health care facilities: inspections:** Current law requires the State Department of Public Health to conduct annual inspections, without notice, of long-term health care facilities, except those facilities that have not had serious violations within the previous 12 months, and in any case to inspect every facility at least once every 2 years. Current law further requires the department to vary the cycle for conducting these inspections to reduce their predictability. Current law requires inspections and investigations of long-term health care facilities that are certified by the federal Medicare Program or the Medicaid program to determine compliance with federal standards and California statutes and regulations to the extent that state statutes and regulations provide greater protection to residents, or are more precise than federal standards. Current federal law requires nursing facilities certified to participate in those federal programs to be subject to a standard survey by the state, conducted without prior notice to the facility, at least every 15 months, as prescribed. This bill would extend the maximum period between inspections of a long-term health care facility from 2 years to 30 months, and would make technical, non-substantive changes.
- The next virtual meeting is scheduled for June 8th at 1:00 pm.
